PROFILE

A creative, result-oriented Software Engineer and Cyber Security enthusiast with a solid foundation in web applications development, keen on building robust, secure and user-friendly software, also interested in malware analysis. On the lookout for an opportunity to leverage my expertise while further developing my skills in a dynamic environment.

WORK EXPERIENCE

Software Engineer Intern

Cathedis 06/2022 - 08/2022

- Modeled the database entities required for the invoicing module, ensuring optimal data organization and retrieval.
- Collaborated with the development team to design and optimize the database schema.
- Implemented the database entities using Axelor and Spring, ensuring data integrity and reliability.
- Worked closely with stakeholders to gather requirements and fine-tune the database structure to meet business needs.
